

Project summary note:

Applicants are encouraged to download and use this template to provide Agri Enterprises with an overview of their proposed projects.

Applications that are deemed to meet the project criteria will be contacted by the Agri Enterprises team to provide additional information.

Due to the large number of proposals received not all submissions will be considered for funding or further project exploration. We however encourage participants to submit their project proposals regardless of meeting the outlined criteria.

The non-criteria matching proposals will be added to our database for consideration in future initiatives.

Proposals can be sent to:
